Part of Paper No. \_\_\_3\_\_\_

Application/Control Number: 09/865,836

Art Unit: 3761

- 1. The abstract of the disclosure is objected to because the abstract should be limited to a single paragraph. The abstract is too long, i.e. more than 150 words. Inferred language, i.e. "There is provided", should be avoided. Also, lines 6 et seq. of the abstract and the claims are inconsistent, e.g. below the target area or in the target area? Correction is required. See MPEP § 605.01(b).
- The disclosure is objected to because of the following informalities: (1) The Summary of the Invention section, i.e. a description of the claimed invention, and the invention of the claims is inconsistent, e.g., below the target area? Where is this claimed? See MPEP 608.01(d) and 1302.01. 2) The description of the nvention, i.e. below the target area, and the invention of the claims, i.e. in the target area, appear to be inconsistent.

Appropriate correction is required.

- 3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: a clear antecedent basis for the invention of claims 1-11 should be set forth, i.e. "in the target area".
- 4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the invention as claimed in claims 1-11 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Application/Control Number: 09/865,836
